

NEOTECH COMPOSITE CO., LTD**Technical Data Sheet (TDS)****Release film**

SF-PP-35

SF-PP-35 is a kind of PP (polypropylene) film. Release film is a very clean and smooth film, which has very good mechanical property, even transparent, low shrinkage, well tensile strength. It is widely used in the vacuum injection process.

Specification and performance sheet:

Character	Standard	Test method
Raw materials	PP	---
Color	Red	---
Temperature resistance (°C)	≥150	GB/T 19466
Thickness (μ m)	35 ± 5	GB/T 6672-2001
Width (m)	≤1.5	GB/T 6673-2001

Remark: the width, length can be slit by customer requirements.

Packing:

Each roll packed by bubble wrap, then packing belt fixed the package after packed by paper tube and corrugated paper on the pallets.

Labels:

Each roll of paper tube core and outside bubble wrap stick the certification, which including product name, specification, batch number, quantity, date code, duty officer.

Storage:

Stored in a ventilated, dry and clean storeroom, avoid exposure. Keep smoothly place when stored or used, clean up sharp objects to avoid puncturing. Handle with care when moving. Storage life less than 2 years.
